

Digipass 300 Comfort Voice

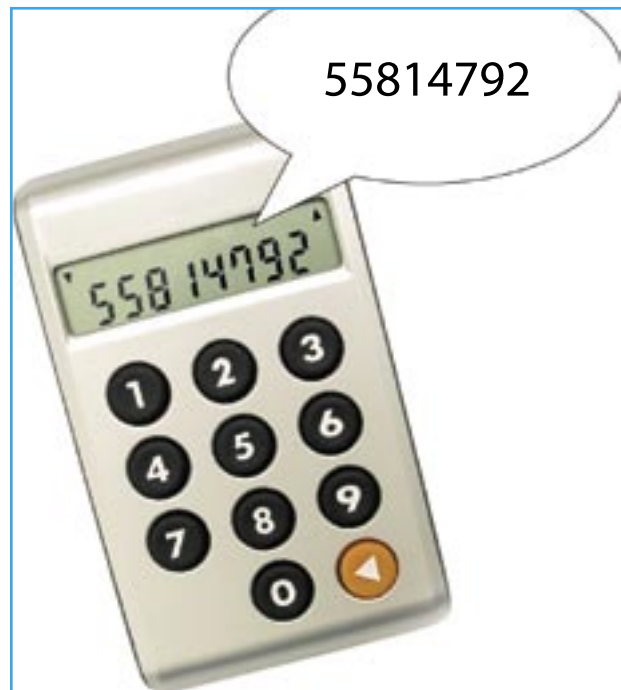

Digipass 300 Comfort Voice (DP300 CV) provides for visually impaired users unparalleled secure accessibility to telephone banking, Internet banking and e-commerce services.

The DP300 CV provides speech based user guidance and acoustic or speech based feed-back of entered data & selected functions. Additionally it converts generated one time passwords into speech. The speech is heard through the DP300 CV's internal speaker or headphones. With the DP300 CV blind or visually impaired people can do exactly what sighted people have been doing for some time: secure telephone banking, Internet banking and e-commerce, enabled by VASCO's trusted authentication solutions.

The DP300 CV offers the same secure remote access, authentication and signature functions as other Digipass family members. The Digipass 300 CV does have a large display depicting large fonts and its keys are extremely easy to operate. Additionally the DP300 CV speaks aloud for you every text displayed visually on the Digipass screen and provides acoustic or speech based feed-back of every key pressed on the Digipass keypad. The DP300s is compatible with all Digipass family members.
